

Dyego A. Costa

FULL STACK WEB DEVELOPER · SOFTWARE ENGINEER

Ceará, Brazil - UTC-3

(+55) 85-99713-0901 | w@dyego.email | dyego.engineer | dyegoaurelio | dyegoaurelio

Skills

DevOps	GCP - AWS - Docker - Azure - Nix - GitHub Actions - Heroku
Programming	GO - Typescript - Javascript - Python - Bash
Front-end	React - Next.js - Redux - Vite - HTML5 - CSS
Back-end	Flask - Django - FastApi - Express.js - MySQL - PostgreSQL - MongoDB
Data Science	Pandas - Power Bi

About

I am passionate about programming, web development and Linux. I have worked with many full stack technologies, mostly using Golang, Typescript and Python.

My approach to technology is characterized by a rapid learning curve and great attention to detail, which allows me to excel in Agile environments and also solve complex problems effectively.

I also have a deep interest on open-source projects and contribute to them whenever I can, especially those I personally use and benefit from.

Experience

Perkup

Remote (United States)

SOFTWARE ENGINEER

May. 2024 - Present

- Improved the overall security of the application and user data protection by revamping the authentication system
- Utilized Firebase and Golang for backend services, including authentication, real-time database, and cloud functions, to build robust and scalable applications.
- Assisted in maintaining Stripe integration for secure and efficient payment processing, improving the overall user transaction experience.
- Contributed to the development and maintenance of a Next.js public catalog for browsing swag and gift items, ensuring a seamless user experience and optimal performance.
- Crafted complex SQL queries for data retrieval and analysis using Google BigQuery, enhancing data-driven decision-making processes.
- Collaborated with cross-functional teams to deliver high-quality software solutions, adhering to best practices and industry standards.

PublicSquare

Remote (Canada)

SOFTWARE ENGINEER

Jun. 2023 - May 2024

- Managed and optimized the infrastructure across AWS, Heroku, and Vercel to ensure high availability and scalability for all company services.
- Developed and maintained CI/CD pipelines using GitHub Actions, achieving automated deployments and seamless integration processes for various services.
- Designed and implemented robust backend solutions using Node.js, Express, and MongoDB, focusing on efficiency and scalability.
- Spearheaded the development of microservices architectures, utilizing Python and FastAPI to enhance modularity and facilitate easier maintenance.
- Integrated advanced AI technologies into backend systems, significantly improving data processing capabilities and service personalization.
- Led the development of dynamic, user-centric web applications using Typescript, React, and Next.js, driving significant user engagement and satisfaction.
- Implemented and deployed highly interactive, responsive web pages, focusing on optimizing user experience and interface design.

Pax Insurance Broker
