WASHINGTON, DC 20005

Job Application for Front End Engineer

About Me

I am extremely passionate about programming, web development and Linux. I have worked with many full stack technologies, mostly using Golang, Typescript and Python. I am a great problem solver and can work with agile environments.

Why Me?

I am a great Front End developer, with 3+ years of experience with React and strong knowledge of CSS. I can't create designs by myself, but I have no problem implementing responsive Figma designs made by designers.

Sincerely,

Dyego A. Costa
